## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-8, 10, 11, 21 and 22, drawn to a method for diagnosing if electromagnetic fields are harmful or beneficial to a patient, classified in class 600, subclass 300.
- Claims 17-20, drawn to a method of promoting nerve regeneration, classified in class 600, subclass 009.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects and the methods cannot be used together.

Claims 9 and 12-16 will be examined with the elected invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Bradley Ruben on 2/21/03 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Ruben indicated he was no longer handling this application.

Application/Control Number: 09/974,542

Art Unit: 3736

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
